ABOUT ME

Full-Stack Developer with 2+ years of professional and freelance experience, and an additional 6+ years developing personal projects. Proficient in React, Next.js, Node.js, TypeScript, and SQL and NoSQL databases. I specialize in resolving technical issues and optimizing both frontend and backend applications, focusing on performance, optimization, scalability, and best development practices.

WORK EXPERIENCE

Front End Developer - *Fanz*

March 2026 - November 2026 (9 months)

- **AI-powered page builder:** developed an AI-driven website builder (wizard, visual editor, and section/full-site generation from prompts), enabling non-technical users to publish and customize their pages independently.
- **Email & Ticket Builder:** built drag-and-drop visual editors for creating emails and tickets, with theme presets, dynamic content personalization, change history (undo/redo), and multi-language support.
- **Onboarding & guided experience:** repeatedly designed and implemented wizards, guided tours, and onboarding flows across different product features, helping users of any background quickly understand and adopt new tools.
- **Ongoing maintenance & support:** resolved customer-reported bugs, addressed user feedback, and handled hotfixes to solve production issues on the spot, ensuring product stability and continuity.
- **Consistent focus on UX/UI:** simple, intuitive, and accessible interfaces, prioritizing clarity and usability over visual complexity, for audiences of any technical level.
- **Stack:** React, Next.js, Node.js, TypeScript, Prisma; active use of agentic engineering (AI agents) throughout the development workflow to speed up iteration, debugging, and QA.

Full-stack Developer - *Pulpou*

September 2024 - September 2025 (1 year and one month)

- Security Solutions: Creation and maintenance of the *Brand Protection* platform for large companies.
- Centralized Auditing: Development of functionalities to identify intellectual property infringements in global marketplaces and e-commerce.
- Full-stack Optimization: Construction of a SPA with React and Node.js APIs, featuring dynamic filters, conditional rendering, and real-time state management.
- Experience Design: Implementation of responsive UI with Bootstrap and Atomizer, facilitating massive auditing and management.
